sent out via email 1-2
business days prior to
training date.*

1. Participants will understand staging and stages of change, as well as how to use staging tools with clients and treatment teams to decide on appropriate interventions
2. Participants will rehearse completion of a contextual and longitudinal assessment for individuals with more than one chronic illness
3. Participants will develop 2 examples of goals, objectives, interventions, and discharge criteria for common co-occurring needs
4. Participants will describe common treatment interventions in individual, group, and family formats at early stages of change
5. Participants will describe common treatment interventions in individual, group, and family formats at action stages of change
6. Participants will be able to describe to administrators and clients the process of fidelity and outcome measurement for IDDT
