

Critical Incident Stress Management (CISM) 3 Day Training Course

Presented by Dennis Porter LMSW, FAAETS

MARCH 10TH, 11TH, & 12TH 2025 8:30A-4:30P

Crisis Intervention is NOT psychotherapy; rather, it is a specialized acute emergency mental health intervention which requires specialized training. As physical first aid is to surgery, crisis intervention is to psychotherapy. Thus, crisis intervention is sometimes called "emotional first aid". Designed to present the core elements of a comprehensive, systematic and multi-component crisis intervention curriculum, this course will prepare participants to understand a wide range of crisis intervention services for both the individual and for groups. Fundamentals of Critical Incident Stress Management (CISM) will be outlined and participants will leave with the knowledge and tools to provide several group crisis interventions, specifically demobilizations, defusing and the Critical Incident Stress Debriefing (CISD). The need for appropriate follow-up services and referrals when necessary will also be discussed.

This 3-day course combines ALL of the content of International Critical Incident Stress Foundation Inc.'s (ICISF) Assisting Individuals in Crisis & Group Crisis Intervention courses.
